

# Filip Stevanovic

Junior Frontend Developer

fstevanovic2003@gmail.com

063 1334385

Loznica, Serbia

github.com/stevanovicc

Motivated and detail-oriented junior web developer with a strong foundation in coding and problem-solving. Proficient in HTML, CSS, JavaScript, and modern frameworks such as React.js. Experienced in building responsive, user-friendly web interfaces and dynamic applications. Familiar with backend technologies like Node.js and programming languages including Java, enhancing my ability to collaborate across the full stack. Passionate about creating clean, efficient code and continuously learning to improve development skills.

## EDUCATION

### Informational systems and technologies

University of Belgrade, Faculty of Organisational Sciences

09/2022 - Present

Belgrade, Serbia

- |                    |                      |
|--------------------|----------------------|
| Programming        |                      |
| - Web development  | - C programming      |
| - Java programming | - Project Management |

## PERSONAL PROJECTS

### Bitfinex Crypto Dashboard (04/2025 - 04/2025)

- Built a React dashboard showing real-time crypto data via Bitfinex APIs. Features include live price updates, searchable trading pairs, virtualized trade history, and optional multi-tab sync with a Shared Worker.

### HabitFlow (12/2024 - 01/2025)

- A React.js app for tracking, managing and improving your daily routines.
- Showcases understanding of React components and state management.

### Portfolio website (11/2024 - 11/2024)

- A personal portfolio, displaying my skills, experiences and interests. Created using React and deployed using Github pages.
- <https://stevanovicc.github.io/filip-stevanovic-portfolio/>

### Dice game (09/2022 - 09/2024)

- JavaScript-based dice game generating random results and comparing scores.
- Demonstrated understanding of DOM manipulation.

### Simon game (09/2024 - 09/2024)

- Interactive game that increases difficulty as players replicate patterns.
- Utilized JavaScript to manage game logic and user interaction.

### University Project (10/2022 - 11/2022)

- A university project, a webpage from which you can order tickets online. Created using HTML, CSS and Javascript.
